

# HOMEWORK P - PART 2

- Next, demonstrate how to revert undesired changes:
  - Switch back to your master branch
  - Add a horrible mistake to your HTML file
  - Commit that mistake and push it to GitHub.com
  - Then, revert to the previous commit, without rewriting history
  - Commit the reverted changes
- Finally, create a pull request in your classmates' repository:
  - Post a link to your repo in the Slack channel
  - Create a fork of your classmates' repositories
  - Add to their HTML file. Say something nice, encouraging or funny
  - Submit a pull request for your change
  - Accept the pull requests that come in for your own project
- Submit a link to your repo via Google Classroom. I should be able to look through your commit history and see these exact steps carried out.
