

3.1. HOW TO START A REPO FROM SCRATCH

1. Create a folder in your Finder
2. Drag folder into GitHub Desktop
3. Click "Create repository"
4. Add files, Publish
5. That's it. Start adding project files.

Create a New Repository

Name

test project

⚠

Will be created as test-project

Description

This is a test project

Local Path

/Users/shellyjames90/Documents/GitHub

Choose...

☒ Initialize this repository with a README
