7. MERGING

- "Merging the timelines"
- When you're finished with a branch:
 - Switch to the branch you want to merge into (e.g. master) via git checkout "master"
 - Pick the branch you want to merge with: git merge "branch name"
- Resolve conflicts, commit. Boom.
 You have now merged a branch into your master branch!

8. FORK

- Duplicating someone else's repo for yourself to edit
- On <u>GitHub.com</u>, use Fork Button!
- Creates a copy of the project that you now own
- You can also pull updates from the original project
- Boom. Now you have a local copy of a remote Git repo!
