1. ADD

- **ADD a particular set of files and/or changes to your local repo**

- **Type:**
  git add [files to add] or git add .

- **Boom. You've added files and changes to your repo! This is also called the <u>staging area</u>!**

2. COMMIT

- **COMMIT a particular set of changes in your local repo.**

- **Commit early, commit often. Commit before the end of the day. There is no such thing as too many commits.**

- **Does not affect your remote repo yet!**

- **Type:**
  git commit -m "Your commit"
