# 4. PULL

- **PULL any new commits that the remote server may have down to your local repo**

- **Always pull before pushing your own commits!**

- **Type:**
  git pull

- **Boom. Now you have the latest remote version of a repo on your local machine!**

5. CLONE

- **Download a LOCAL copy of a git repo from a REMOTE server aka another user, including all history.**

- **In Terminal, cd into path where you want to clone the project**

- **Type:**
  git clone https://github.com/CyanLetter/WebDev3_Spring2018

- **Boom. Now you have a local copy of a remote Git repo!**
